September 17, 2025

## 1 Retrieval metrics with different embeddings, before keypoints

- flags
- positions
- positions + angles + ratio
- positions normalized
- positions normalized + angles + ratio

Load the dataset

```
[2]: from matplotlib.lines import lineStyles
    %load_ext autoreload
    %autoreload 2

    from libraries.embeddings_utils import *
    import ipynbname
    from libraries.classifier_utils import *
    from libraries.retrieval_utils import *
    from libraries.file_manager_utils import *

    project_dir = f"{os.getcwd()}.
    ↪split('SIDS_revelation_project')[0]}SIDS_revelation_project/"
    image_dataset_path = f"{project_dir}datasets/onback_onstomach_v3"
    model_path = f"{project_dir}/models/4.fd_weights/best.pt"
```

The autoreload extension is already loaded. To reload it, use:

```
%reload_ext autoreload
```

```
[3]: emb_builder = EmbeddingBuilder(model_path, image_dataset_path, "load")
```

Extracting dataset info from .coco.json

file:-----

Dataset contains 4158 valid samples, and labels are {'baby\_on\_back': 1,  
'baby\_on\_stomach': 2}

-----  
-----

Loading features from

```
.CSV-----
Features loaded succesfully, in particular there are 4158 files in the dataset
-----

Embedding builder initialized
successfully-----
Face detection model: 4 (YOLOv8)
Dataset: /home/terra/Desktop/unimore/AI_engineering/SIDS_revelation_project/data
sets/onback_onstomach_v3
Dataset dimension: 4158
Dataset labels: {'baby_safe': 0, 'baby_unsafe': 1}
-----
-----
```

```
[4]: print(f"Dataset contains {emb_builder.dim_dataset} elements.\nIn particular,
      ↳{emb_builder.dim_dataset-emb_builder.y.sum()} {'baby_safe' if emb_builder.
      ↳classes_bs['baby_safe'] == 0 else 'baby_unsafe'} and {emb_builder.y.sum()}
      ↳{'baby_safe' if emb_builder.classes_bs['baby_safe'] == 1 else
      ↳{'baby_unsafe'}}")
```

Dataset contains 4158 elements.  
In particular 2146 baby\_safe and 2012 baby\_unsafe

### Create embeddings

```
[5]: e_flags = emb_builder.create_embedding(flags = True)
e_positions = emb_builder.create_embedding(flags = True, positions=True)
e_positions_norm = emb_builder.create_embedding(flags = True,
      ↳positions_normalized=True)
e_all_unnorm = emb_builder.create_embedding(flags = True, positions=True,
      ↳geometric_info=True)
e_all_norm = emb_builder.create_embedding(flags = True, positions_normalized =
      ↳True, geometric_info=True)
e_all = emb_builder.create_embedding(flags = True, positions = True,
      ↳positions_normalized=True, geometric_info=True)
```
